Phys. 122: 127-135; TAP + H2O2 (1, 12, 24 hr); TAP + sorbitol (1, 2, 6, 24 hr); TAP + Cd (1, 2, 6, 24 hr).

Polya mRNA was purified from each sample, pooled and cDNA synthesized. The cDNA was directionally cloned into lambda Zap II (Stratagene) in the BCORI (5') and XhORI (3') sites, pBluescript II SK- plasmids were excised from the lambda ZAP clones by superinfection with ExAssist (Stratagene) phage. The library was normalized using method 4 described in Bonaldo et al., (1996) Genome Research 6: 791-806."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         /organism="Chlamydomonas reinhardtii"

                                                                                                                                                                                                                                                                                                                                                                  US-08-081-072-18

Sequence 18, Application US/08081072

Sequence 18, Application US/08081072

Patent No. 5641654

GENERAL INFORMATION:
APPLICANT: No. 5641654cru MAKI, Kenjiro YAMAGUCHI, Ayumi, APPLICANT: TOYOSHIMA, and Michinori KOHARA

TITLE OF INVENTION: NON-A NON-B HEPATITIS.SPECIFIC

TITLE OF INVENTION: ANTIGEN AND ITS USE IN HEPATITIS

TITLE OF INVENTION: DIAGNOSIS

NUMBER OF SEQUENCES: 24

CORRESPONDENCE ADDRESS:
CORRESPONDENCE ADDRESS:
STREET: 130 Water Street
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Score 559; DB 1; Length 742;

Betent No. 5641654

GENERAL INFORMATION:
APPLICANT: No. 5641654 and Michinori KOHARA
TITLE OF INVENTION: NON-A NON-B HEPATITIS-SPECIFIC
TITLE OF INVENTION: ANTIGEN AND ITS USE IN HEPATITIS
TITLE OF INVENTION: DIAGNOSIS
NUMBER OF SEQUENCES: 24
CORRESPONDENCE ADDRESS:
ADDRESSEE: Dike, Bronstein, Roberts & Cushman

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Length 742;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 18 Application US/08449093A
Patent No. 5662906
GENERAL INFORMATION:
APPLICANT: No. 5662906oru MAKI, Kenjiro YAMAGUCHI, Ayumi
APPLICANT: TOYOSHIMA, and Michinori KOHARA
TITLE OF INVENTION: ANTIGEN AND ITS USE IN HEPATITIS
TITLE OF INVENTION: DIAGNOSIS
NUMBER OF SEQUENCES: 24
CORRESPONDENCE ADDRESS:
ADDRESSE: Dike, Bronstein, Roberts & Cushman, LLP

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
